STAT
MEMORANDUM FOR: [REDACTED]

Chief, Printing and Photography Division

STAT
FROM: [REDACTED]

Director, Foreign Broadcast Information Service

SUBJECT: New FBIS Publication/USSR Title Consolidation

1. In connection with the establishment of its Science and Technology Center, FBIS needs to add a publication to its product line. This publication, SCIENCE AND TECHNOLOGY PERSPECTIVES, would be published about twice a month from ETECS-prepared galleys. We will hold its length to less than 16 pages and believe it should have a two color cover. I would appreciate your concurrence in proceeding with this new publication.

2. We have been advised by your staff officers that a 7 May publication date is feasible provided the galleys are given to P&PD by 2 May. We can meet that deadline and will submit distribution lists of Agency and external consumers at least two weeks in advance. Questions regarding this new publication can be directed to [REDACTED] Chief of the Science & Technology Center, on extension [REDACTED]

STAT

3. As part of our ongoing review of FBIS publications, we are in the process of reducing the number of JPRS Soviet economic titles from seven to one, which should result in significant savings in effort for P&PD.

4. I also want to take this opportunity to express my appreciation for the help [REDACTED] provided during planning stages of our publication.
